CALEX JOINS U.S. EPA SMARTWAY TRANSPORT® PARTNERSHIP

Pittston, Pa. – **Calex “Integrated Supply Chain Solutions”** today announced that it joined the SmartWaySM Transport Partnership, a innovative collaboration between U.S. Environmental Protection Agency (EPA) and the freight industry designed to increase energy efficiency while significantly reducing greenhouse gases and air pollution.

Calex will contribute to the Partnership’s goal to reduce 33 to 66 million metric tons of carbon dioxide and up to 200,000 tons of nitrogen oxide per year by 2012 by improving the environmental performance of our freight operations. Carbon dioxide is the most common greenhouse gas, and nitrogen oxide is an air pollutant that contributes to smog. By joining SmartWay Transport Partnership, **Calex** demonstrates its strong environmental leadership and corporate responsibility.

Launched in February 2004, the SmartWay Transport Partnership aims to achieve fuel savings of up to 150 million barrels of fuel per year. The Partnership brings together major freight shippers, trucking companies, railroads, logistics companies and trade/professional associations to pursue mutually beneficial efficiencies that result in emissions reductions and other environmental improvements, as well as cost savings to the companies. The Partnership currently has approximately 2,000 partners.

For more information about **Calex**, visit www.calexlogistics.com or call **570-603-0180**

For information about the SmartWay Transport Partnership visit www.epa.gov/smartway.
